THE LARGEST EVER TRAINING SEMINAR IN L. RON HUBBARD'S STUDY TECHNOLOGY IS HAPPENING!

The African continent is about to discover L. Ron Hubbard's Study Technology on a scale never seen before!

It all starts in just a few weeks, on the 15th of July 2004, as 400 top teachers in Ethiopia will convene in Addis Ababa for a two-week seminar on LRH® Study Technology organised by the Ministry of Education of Ethiopia.

The seminar will be delivered in the top university of the country, the University of Addis Ababa, as well as in two teacher training centres, the Teacher Technical Institute of Addis Ababa and the Kotebe Teacher Technical Institute.

Officials of the Teacher Technical Institute meet with New Era and ABE representatives to plan out training seminars.

Applied Scholastics and NEW ERA Publications have arranged for top educators in L. Ron Hubbard Study Technology to deliver the seminars and train the country's top teachers, so that they can in turn export the Study Technology to the whole country of Ethiopia.

The Minister of Education herself is expected to attend and deliver their certificates to the seminar graduates, fully certifying them as trained specialists in LRH Study Technology.

The importance of this project cannot be underestimated and will mean a completely new future for the whole continent. Indeed, following the completion of the seminar, the results will then be presented to leaders of the African Union (Africa's equivalent to the European Union), to organise similar training pilots in the rest of the African countries.

Addis Ababa houses the buildings of the African Union where policy for the whole of Africa is being decided.

Addis Ababa is the active centre where decisions affecting the whole of Africa are routinely shaped and exported throughout the continent. This is our opportunity to bring to the people of Africa a workable technology they can use to create a brand new era for their countries, as millions of African students and trainees will have, as a result of this teacher training, a first-hand introduction to LRH through his study technology.

To provide the Ethiopian teachers with the LRH books they need and further disseminate LRH's study books to representatives of other African countries, we need on an immediate basis copies of Learning How to Learn and The Way to Happiness as well as packages of the Ron magazine on Education and the basic Study Manual.

You can help us provide this life-saving technology to all the people of Africa. Contact us and make your contribution today!

Millions of African children will be trained in LRH Study Technology upon successful completion of this project
